

PLM Consulting

- Requirements**
- You wish to use the advantages of an SAP-integrated document management system
 - You wish to use a direct integration for the management of your CAD documents
 - You wish to map the processes in design in your SAP system
 - You wish to provide your CAD documents and the resultant viewing files in a corporate pool throughout the group

Solution

We analyse the process in design and map these in SAP PLM as part of an introductory project. For the management of your Pro/ENGINEER data we install "mySAP PLM Integration for Pro/ENGINEER", the SAP price list product developed by us and adapt it to the specific corporate requirements.

- Project steps**
- Incorporation of the design process in a business blueprint
 - Installation of the requisite software components, e.g.
 - CAD Desktop
 - Kpro (Content and Cache Server)
 - Pro/ENGINEER direct integration
 - Performance of customizing
 - CAD Desktop
 - Document types and status networks
 - Modifications
 - Material and bill of material creation
 - Conversion processes
 - Training of users

- Pre-requisites**
- The SAP PLM project must be supported by corporate management.
 - A project manager must be appointed by the company
 - A kick-off meeting should take place at the start of the project with the areas/persons involved
 - Access to the analysed departments must be regulated

- Offer**
- On the basis of a quantity structure and rough requirement catalogue we create an offer for the implementation of an mySAP PLM consulting project. An account is drawn up on the basis of work performed.
 - On request we can also provide the requisite hardware
