Solution

Implementation

SAP PLM starter kit for the Pro/ENGINEER integration

- Requirements**
- Verified statement about the costs and benefits of an implementation of mySAP PLM integration for Pro/ENGINEER within a given time frame
 - Proven basis for a decision by concrete experiences with the software (handling, performance, stability) -> minimization of risks
 - Build up of mySAP PLM Know-how in your own company
 - Intensive coverage of experienced consultants during the evaluation phase
 - Limitation of your own resources
- Solution**
- Together we are running a project within a given time and price frame. The installation will be done on an existing system or we are also able to support you with a test system.
- Project steps**
- Installation, basic configuration and system tests
 - Administration and user trainings
 - Workshops to configurations, processes and customer specific requirements
 - Telephone support during the test phase
 - Presenting the results during a workshop and management presentation
 - Benefits
 - Processes
 - Set up of a list with company specific requirements
 - Set up of a rough project and cost plan
- Pre-requisites**
- Customer sets up a team with 3 persons (2 CAD Key-User, 1 SAP admin/supporter)
 - CAD workstation Sun, HP UX 11 or Intel based
 - One available Pro/E license
 - Test agreement for the mySAP PLM integration for Pro/ENGINEER
 - SAPGui installation on the local CAD workstation
 - SAP 4.6C, 4.7 or ECC5.0 test system with CAD Desktop
 - SAP Content Server
- Offer**
- The package is offered with a fixed price of 13.000 €. Travelling and hotel costs are included within germany. For project locations outside of germany additional travelling costs will be charged.
 - Optional: Test system can be provided (with additional costs).
