

Consulting

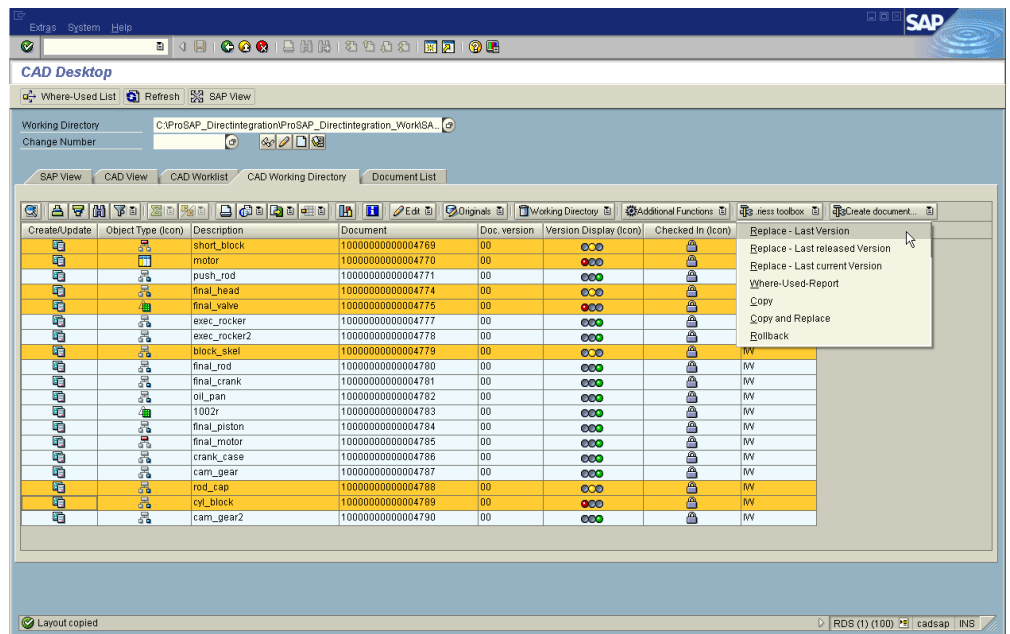

Solution

Implementation

VersionAssistant

Requirements

- You wish to update obsolete versions of local Pro/ENGINEER objects in your current working directory
- You wish to apply the functionality from your usual CAD desktop environment
- You wish to use multiselection

Solution

.riess engineering has developed the VersionAssistant to ideally support the replacement of obsolete versions of Pro/ENGINEER objects. This tool has the following functions:

- Replace – last version
- Replace – last released version
- Replace – last updated version

Procedure

- The VersionAssistant is installed and training provided by our consultants
- Implementation is performed via BAdI in CAD Desktop
- Together with our consultants customised extensions can be specified
