

### The experts on integration of Pro/ENGINEER® in SAP systems

**.riess engineering** .riess engineering europe gmbh has specialised in consulting, introduction and migration of SAP PLM. It offers numerous solutions for data migration and process optimisation. The company is "Tier 1 Development Partner" of SAP AG and has sole responsibility for the development of SAP PLM integration for Pro/ENGINEER®. In addition to installation, customizing and further development of the SAP price list product, individual customer software solutions are also developed.

#### Range

- **Products**
  - The SAP PLM integration for Pro/ENGINEER® guarantees a seamless, homogenous integration of SAP into the CAD system Pro/ENGINEER®, providing all relevant SAP functions within the usual design environment. By using the CAD desktop the designer can work in his CAD-typical structures in a particularly simple and efficient manner. A separate document management system is rendered completely superfluous.
  - Numerous solutions for data migration and process optimisation to make the conversion to SAP PLM as smooth as possible.
- **Consulting**

Implementation of SAP PLM projects, including Business Blueprint, feasibility studies, installation of the necessary software components, customising and training. Within the PLM Alliance .riess also offers the introduction of SAP PLM for a set price.
- **Software development**

Development of customised extensions in the form of user exits, CAD desktop extensions or other SAP applications. .riess engineering europe has broad ABAP and BADI know how.
